Description

Qaptain transforms classroom quiz management with an intuitive iOS app designed for educators and students. Teachers can effortlessly create classrooms, build engaging multiple-choice quizzes, and monitor student progress in real-time. Students join classrooms using secure passwords, take interactive quizzes, and track their performance instantly.

For Teachers:

- Create classrooms with unique, regenerable passwords
- Build custom quizzes with multiple-choice questions
- Set deadlines and manage quizzes
- View detailed student performance
- Monitor late submissions and attempt history
- Manage classroom membership easily

For Students:

- Join classrooms with teacher-provided passwords
- Take interactive quizzes with immediate feedback
- Track personal performance and attempt history
- View classmates and classroom information

Key Features:

- Real-time synchronization across all devices
- Secure Firebase authentication and data storage

Perfect for K-12 schools, universities, training centers, and any educational environment. Simple, effective, and designed with both teachers and students in mind.
